

PREFACE

The Rocky Mountain Area Incident Mobilization Guide identifies established standards and procedures, which guide the operations of the Rocky Mountain Area Multi-Agency logistical fire dispatch and coordination activities. The guide is a supplement to the National Interagency Mobilization Guide and is designed for amendments as needed, and shall be retained as currently applicable until amended. Dispatch Centers shall supplement the Area Guide as necessary.

Please review each chapter of the Rocky Mountain Area Interagency Mobilization Guide carefully and submit any recommendations, changes and updates to the guide, through dispatch channels, to the Rocky Mountain Area Interagency Coordination Center (RMC).

Dispatch Centers, please correct and consolidate all pertinent information from the units within your area of responsibility and return to RMC.

Chapters 10-90 and Appendix A information is due prior to the **SECOND FRIDAY IN JANUARY**, annually.

It is every unit's responsibility to ensure the information submitted is correct and final before it is submitted to RMC for publishing. Any unit failing to submit their information by the specified due dates risks not having their information published in the Rocky Mountain Interagency Mobilization Guide.

An annual RMA Mobilization Guide review/update will be done the 2nd week of February. Representatives from the following groups will participate: RMCG, Dispatch, Operations, Aviation, Fire Business Management and RMC.

If you have any questions or comments, please contact the Rocky Mountain Area Coordination Center.

Thank you for all of your input and efforts.
